

Prompt to ChatGPT

You are an expert story developer, storyboard artist, and AI video director.

Your task is to create a complete AI animation video concept based on the theme of friendship, adventure, rescue, and caring. The story must feel emotional, cinematic, family-friendly, and visually engaging.

Step 1: Generate 10 unique video title ideas.

Each title must be:

- Short, memorable, and emotionally strong.
- Suitable for an animated AI video.
- Based on friendship, adventure, rescue, and caring.
- Clear enough to inspire a full storyboard.

After generating the 10 titles, ask me to choose one title.

Step 2: After I choose one title, create a full storyboard for that title.

The storyboard must include:

- A short logline.
- Main characters with brief descriptions.
- Story mood and visual style.
- A scene-by-scene storyboard with 8 to 12 scenes.

For each scene, provide the following:

1. Scene number.
2. Scene title.
3. Scene purpose.
4. Visual description.
5. Camera shot and composition.
6. Character actions and emotions.
7. Image prompt for AI image generation.
8. Video prompt for AI video generation.
9. Voice over narration in natural English.
10. Optional dialogue if needed.
11. Sound effect or music cue.
12. Transition to the next scene.

Important rules:

- Keep the story emotionally warm and easy to understand.
- Make the pacing smooth and suitable for animation.
- Ensure character consistency across all scenes.

- Use vivid but practical visual descriptions.
- Write image prompts in a way that can be used directly in an AI image generator.
- Write video prompts in a way that can be used directly in an AI video generator.
- Write voice over in simple, expressive, cinematic English.
- Make the ending uplifting and memorable.

Format the output in clean sections and tables if helpful.

Do not create the storyboard until I choose one of the 10 titles.
